TABLE I.

Area, Houses and Population.

1 The figures in this table relate to the whole of the Indian Empire except certain tracts beyond the administrative frontier in Assam and Burma

2 The political control of Aden, which is still technically a part of the Bombay Presidency is with the British Government, but as its general administration is still directly under the Government of Bombay Aden has been shown for the purpose of the census as part of the Bombay Presidency. Figures for the Kuria Muria Islands, Sokotra and the Protected States adjoining Aden on the mainland are not however included. The population of the Kuria Muria Islands is unknown but is in any case very small. The population of Sokotra is roughly estimated at 12,000, and that of the Protected Tribes on the mainland at 664,000. The details are as follows — Abdali 35,000, Fadh 20,000, Akrahi 1,000, Houshab 15,000, Amiri, Azraki, Shairi and whole of Radfan 25,000, Upper Aulaki Sultan and Sheikh 30,000, Lower Aulaki Sultan 15,000, Lower Yafai Sultan Mohsin bin Ali 70,000, Upper Yafai Sultan Saleh bin Omer and Monsatta 80,000, Subehis including men of Shaab 20,000, Audali 7,000, Balehaf and Bir Ali including their independent subjects (such as Hawra 500 and Irka 200), 30,000, Kaati's dominions, Doan and Kathiri of Hadramut 300,000, Alawi 1,000, Behan 15,000

3 The table does not include the population of French and Portuguese India. The census of French territory was effected on the 18th March 1921, at the same time as that of British India, when according to the provisional totals it was found to have 269,579 inhabitants (males 133,251, females 136,328). Portuguese India, comprising the districts of Goa, Daman and Diu, was enumerated in 1920, but no figures had been received when this table was sent to press

4 The table does not deal with the external states of Nepal, Afghanistan and Bhutan. Estimates of the population of these countries are as follows — Nepal 5,600,000, Afghanistan 6,380,500, Bhutan 250,000

5 Details of some of the principal states included in the Agencies and Provincial groups will be found on page 1, where also is shown the population of the areas under British administration in certain Indian states

6 The figures in this table are based on a detailed enumeration on the standard schedule except in the following cases —

<i>Baluchistan—</i>		<i>Kashmir—</i>	
*Tribal areas . . .	701,789	*Frontier Ilqas	60,091
<i>Burma—</i>		<i>North West Frontier Province—</i>	
Somra Tract	7,038	Agencies and Tribal areas	2,770,608
East Manglun	26,701	<i>Andamans and Nicobars—</i>	
Unadministered territory in Pakokku Hill Tracts	8,766	Andamanese	577
		Nicobarese	375

In the tracts marked with an asterisk a simplified form of schedule was employed. Elsewhere the population was estimated. The manner in which the estimates were made is described in the introduction to the Report Volume

7 The difference between some of the areas here shown and those in the corresponding table of 1911 is due partly to the inclusion of new areas, partly to inter-provincial transfers and partly to corrections made on the basis of recent surveys

8 The figures for Madras States in this and subsequent tables as a rule include those for Cochin and Travancore. In this and some other of the main tables the figures for these two states are also shown separately. The census of these states was carried out independently and their statistics do not appear in the report for the Madras Presidency but in the separate volumes of the state reports

9 In Table XXIII at the end of the volume the more important figures are given for the districts in each province and for Indian states not shown separately in the general tables. For further details regarding these units the local census reports should be referred to

DETAILS OF VARIATION IN THE POPULATION OF THE PRINCIPAL STATES

[illegible]

TABLE III.

Towns and Villages Classified by Population.

1. The population here dealt with falls short of that in Table I by 2,924,720 persons as detailed below:—

Country	Population	Remarks
Aden	2,000	Table III was not prepared
Burma	47,000	The estimated populations have not been obtained in this table as no detailed statistics were available
North West Frontier Province (the Federated Tribal Areas)	2,571,720	No statistics of the number of villages are available

A further difference between the number of inhabited towns and villages as shown in this table and Table I is due to the fact that no statistics of the 44 estimated villages of the Palokkua Hill Tract in Burma and of the three towns in Aden are available.

2. In this table as in Tables I, IV and V a cantonment adjoining a municipality has been treated as an integral part of the municipality.

3. In the districts in which a revenue and cadastral survey has been carried out the *mauza* or survey village has been taken as the census village. In the case of Burma the figures represent village tracts and a village tract is defined by law as the local area under the jurisdiction of a headman including a village or group of villages and adjacent lands. Elsewhere the census village is the residential village or group of houses bearing a separate name, small outlying hamlets being ordinarily treated as part of the main residential villages to which they appertain.

4. Travellers enumerated in encampments, boats and trains, etc., have as a rule been shown separately in this table, whereas in Tables IV and V they have been included in the population of the town in which the place of enumeration is situated.

table fall short of those shown in Table I—vide paragraph 1 on the title page

TABLE IV.

Towns Classified by Population with Variation since 1872.

1 For the purpose of this table a town was defined as including every municipality of whatever size, every cantonment, all civil lines not included in municipal limits, and every other collection of houses permanently inhabited by not less than 5,000 persons which is of an urban character though not under municipal government. The numerical test however was not always strictly applied, some places with less than 5,000 inhabitants were, for special reasons, treated as towns, while others with a larger population were omitted. Some places treated as towns in 1911 have now been excluded, and others have been newly included. The net result of these changes on the urban population is shown on page 24. It was laid down that no adjustments of the population of individual towns should be made for previous censuses but this instruction has not been carried out in all cases.

2 The towns are grouped in six classes according to their population in 1921. The first class consists of towns with a population of 100,000 and over, the second with from 50,000 to 100,000, the third from 20,000 to 50,000, the fourth from 10,000 to 20,000, the fifth from 5,000 to 10,000 and the sixth under 5,000. In the first three classes the towns, other than the three Presidency towns which come first, are arranged alphabetically in each class, in the last three only the number of towns and their aggregate population are given.

3 This table was not prepared for Aden and accordingly there is a difference of three in the number of towns as shown here and in Table I. Similarly the urban population falls short by 56,500 persons. Adjustment on this account has been made in the figures of the previous censuses also.

4 This table takes in six censuses and gives the net variation for the period 1872-1921 as well as for each intervening decade. As mentioned in paragraph 2 to the explanatory note to Table II, the figures entered for 1872 refer in some cases to censuses taken in other years. Where the first census took place in 1881 columns 8, 13 and 14 are blank. It has been found impossible to ascertain the former population of many of the places now treated as towns for the first time. There are also certain towns where the total population has been ascertained but the distribution by sex cannot be given, so that the population does not agree with the figures in the sex columns. Except for 1921 the class totals, which have been given for three censuses only, are not the totals of the figures given below them, but represent the whole urban population recorded at each census. The same remarks apply to the figures shown against India.

5 The following figures show the population of certain hill stations according to a census taken during the season of 1920 in the United Provinces and of 1921 in Bengal and the Punjab —

NOTE 1.—The figures in the statement include the 8 included in each Province, but those for Madras exclude Cochin and Travancore.

NOTE 2.—The figures have been calculated on the basis of the 1911 and 1921 censuses and have not been adjusted to account for the statement.

TABLE V.

Towns arranged Territorially with Population by Religion.

- 1 This table shows the territorial distribution of the urban population by religion
- 2 As in Table IV the towns are grouped into six classes according to their population Those in the first three classes are entered separately in alphabetical order Those in the last three are not shown in detail, the total number of towns being given with their aggregate population
- 3 The figures for the Madras States include those of Cochin and Travancore which are also given separately on page 38
- 4 The column "Others" includes the following —

TABLE VI.

The Population by Religion.

* 1 The total population shown in this table is less than that shown in Table I owing to the omission of 2,770,666 persons (males 1,464,384, females 1,306,282) in the North-West Frontier Province and 43,093 persons (males 21,453, females 21,640) in certain tracts in Burma who were not enumerated by religion

2 The general arrangement is the same as that of Table VI in the India Census Tables of 1911 except that the heading "Animist" has been changed to "Tribal Religions". This change has been made in all tables in which religion is a basis of classification for reasons which have been set forth in Chapter IV of the Report Volume

3 The head "Minor Religions and Religion not returned" includes the following —

TABLE VII.

Age, Sex and Civil Condition by Religion

1 The age shown in this table represents the number of years completed and not the current year of age. Divorced persons have been entered as "Widowed". Persons recognised by custom as married have been shown as such, even though they have not gone through any formal ceremony.

2 The table is divided into two parts. Part I contains the statistics for the total population of India and for each religion. Part II contains the statistics for the total population and the three (numerically) most important religions of the main provinces and states. The figures for the provinces do not include those for the states attached to them, which, where important, are given separately.

3 The population here dealt with falls short of that in Table I by 3,592,038 persons enumerated in tracts where age and civil condition were not recorded, as noted below —

	Persons	Males	Females
<i>Included in Tables I and II</i>	778,279	428,439	349,840
Andamans and Nicobars	952	500	452
Baluchistan	726,727	178,295	148,038
Baluchistan States	778,466	207,566	172,000
Kashmir State	60,991	32,641	28,450
North West Frontier Province (Agencies and Tribal areas)	11,647	11,647	
<i>Included in Table I but not included in Table II</i>			
Burma	43,093	21,457	21,640
North West Frontier Province (Agencies and Tribal areas)	2,770,666	1,464,384	1,306,282
Total	3,592,038	1,914,276	1,677,762

4 The distribution by religion of the 778,279 persons omitted from this table but included in Table VI is as follows —

Hindu	22,621	15,373	7,148
Arya	41	30	11
Sikh	1,354	1,052	302
Buddhist	2	2	
Musalman	752,517	410,590	341,927
Christian	892	892	
Tribal Religions	952	500	452
Total	778,279	428,439	349,840

A further difference in the various religions as shown in this table and in Table VI is due to the following reasons —

- (1) In Kashmir 324 persons (Hindus—162 males, 140 females, Musalmans—11 males, 11 females) have been classed in "Minor Religions"
- (2) In Burma 31 Europeans (15 males, 16 females) who were classed as Buddhists in Table VI have been shown here under Christians
- (3) 734 persons of Indefinite Beliefs (455 males, 279 females) shown under "Minor Religions and Religion not returned" in Table VI have in this table been included in Christians
- (4) Jews who were shown separately in Table VI have here been included in "Minor and Unspecified"

TABLE IX.

Literacy by Selected Castes, Tribes or Races.

1 This table has been prepared for all Provinces and States except the Andamans and Nicobars and Aden. Its object is to throw light on the progress made in literacy by the different classes of the community. In the Provincial volumes all the more important castes have been dealt with. In this table for the whole of India statistics are given only for a sufficient number of castes to illustrate the degree of literacy in the various social strata. The statistics for Ajmer, Merwara, Coorg and Sikkim have here been left out of account as the number of persons dealt with is relatively insignificant. The figures for Provinces include those for the States attached to them, except in the case of Bombay where this table was compiled for British Territory only. As separate statistics for 1911 for Delhi and Gwalior were not available they have, for the sake of comparison, been classed under the Punjab and Central India (Agency) respectively.

2 Within each Province, State or Agency, the castes are arranged in order according to the proportion of literate persons in each.

3 As in Table VIII the figures for persons literate in English (columns 8 to 10) are included in those for total literate (columns 5 to 7).

4 The total strength of a caste in this table does not necessarily tally with that in Table XIII, as the latter includes figures added in the course of classification which the present table does not. The strength of a few castes is also not the same as in Table XIV owing to the fact that figures have been compiled for different local areas. Finally the same castes have not always been selected for the purpose of each of the two tables.

TABLE X

Language.

1 The population dealt with in this table falls short of that in Table I by 2,886,297, representing persons who were enumerated in tracts where language was not recorded, viz, 60,991 in the Frontier Ilqas in Kashmir, 2,782,213 in the Agencies and Tribal areas of the North-West Frontier Province and 43,093 in Burma

2 The table is divided into three parts Part I is a general statement showing the number of persons who speak (A) Vernaculars of India, (B) Vernaculars of other Asiatic Countries and Africa and (C) European languages In Part II the languages have been classified in accordance with the scheme laid down by Sir George Grierson, except as regards Burma where a new classification scheme was drawn up locally Part III shows the linguistic distribution of the inhabitants of each Province, State or Agency

3 No attempt was made to obtain statistics of dialects on this occasion and any dialect which was not a true language was included with the language to which it belongs according to the Index of Indian Languages In the case of dialect-names which were not found in the Index, classification has been made on the basis of the previous Census Reports or of local information

4 The Gipsy languages have been shown as one unit in this table The details of them as also the dialects included in Bhlh are given below —

TABLE XI.

Birthplace.

1. The total population shown in this table is less than that shown in Table I by 56,500 persons (8,891 male, 48,106 female) owing to the exclusion of Aden where this table was not compiled.

2. The general arrangement of the table is the same as that of the corresponding table of the last census. It is divided into four parts.

Part I.—Is a general summary giving for the whole of India and for each Province, State or Agency the number of persons born in India in other Asiatic Countries—in Europe—in Africa and Japan.

Part II.—The general groups of Part I are here distributed among the particular countries which they are made up and detailed as follows:—for the whole of India and for each Province or State, giving the number of persons born in different parts of India—in Afghanistan, China, the United Kingdom, &c.

Part III.—Shows the distribution according to the place of enumeration at the census of the persons born in each Province, State or Country.

Part IV.—Illustrates internal migration. Columns 2 give the total number of immigrants, that is to say of persons born in other parts of India who were enumerated in the Provinces or States entered in the first column. Column 3 treats as emigrants those persons who are born in the Provinces or States shown in column 1 but were enumerated in other parts of India. The fourth column shows the balance of emigration or immigration in each case, and the subsequent columns give particulars of the net interchange of population which goes to make up the balance for or against any given Province or State. The details working up to the total will be found in Part II. To take a simple instance: 10 persons born in Ajmer Merwara were enumerated in Assam and 7 persons born in Assam were enumerated in Ajmer Merwara. The difference of 23 represents the net emigration from Ajmer Merwara to Assam and appears first in column 5 as the net gain of Assam from Ajmer Merwara and again in column 7 as the net loss of Ajmer Merwara to Assam. Of the gross figure 30 is shown with details of sex in Part II under Assam while 7 is entered under Ajmer Merwara. As Part IV deals only with internal migration immigrants born outside India (including French and Portuguese Settlements) as well as those Indians whose birthplace was not specified are excluded from the statistics. An attempt will be made in the body of the Census Report to strike a balance between immigration and emigration for India as a whole.

TABLE XII.

Infirmities.

1 This table is divided into two parts. Part I contains a general summary showing, by Provinces and States, the total number of persons recorded as suffering from each infirmity. Part II shows the distribution of these persons by age for India and the main Provinces and States.

2 The procedure adopted in the different Provinces and States in dealing with persons suffering from more than one infirmity has not been quite uniform. As a general rule they were shown separately under each head, but were counted only once for the purpose of columns 2 to 4 of the table. The population afflicted does not therefore correspond with the aggregate of the figures for the several infirmities. Further details regarding persons afflicted with more than one infirmity will be found on page 142.

TABLE XIII.

Caste, Tribe, Race or Nationality.

In 1901 a full record of castes was made for the purposes of the Ethnographic Survey. The number tabulated was reduced in 1911 by the exclusion of those castes which were below a certain percentage of the population. Still further reduction has been made on the present occasion, the Provincial Superintendents being asked to select only such groups as are sufficiently numerous or important to represent the main composition of the population in its various social grades. In this table for the whole of India a proportional limit was fixed for each Province and castes falling below this limit were omitted. Thus even in those castes which have been tabulated the statistics do not always represent their total strength. Nor does the table include Christians, who are specially dealt with in Tables XV and XVI.

2 The table is divided into two parts. Part I contains a general list of the castes and tribes with their distribution by religion, the localities for which the castes are tabulated have been shown against each caste, but figures for each locality have not been given as they are already available in Part II which shows the principal castes in each Province, State or Agency. In Burma the caste distinction was not preserved, and the whole population was classified by race, the indigenous races being arranged in ethnological groups and the other races distinguished according to quasi-national classes popularly recognized in Burma. In Bombay and Madras combined figures were given for those professing Hindu and tribal religions.

3 Where, as is frequently the case, the same group is known by several names, it has been shown in Part I under the one most generally current, the other names being added in brackets. For example, Hajjam (Nai and Napit), Dhuniya (Bahna, Nadaf), and so on. In Part II each caste has been shown under the name most common in the Province or State concerned.

4 The statistics for Ajmer, Delhi and Gwalior have been included with those of the Rajputana (Agency), the Punjab and the Central India (Agency) respectively, while the figures for Madras include those for Cochin and Travancore.

TABLE XIV.

Civil Condition by Age for Selected Castes.

1 This table contains statistics of Civil condition by age for selected castes and tribes, whereas Table VII deals with the total population. The object of the table is to illustrate the relative prevalence of infant marriage and the prohibition of the remarriage of widows among the various social strata in different parts of India. For the reason given on the title page of Table IX the total strength of a caste in this table does not necessarily tally with that in Table XIII.

2 Within each Province, State or Agency the castes are arranged according to the frequency of infant marriage, *i.e.*, according to the proportion which the number of married females under 12 years of age bears to the total female population. As in Part II of Table XIII, each caste has been shown under the name most common in the Province or State concerned.

3 The figures for Provinces include those for the States attached to them except in the case of Bombay, where this table was compiled for British Territory only. As in Table VIII Delhi, Gwalior and Ajmer-Merwara have been classed under the Punjab, Central India and Ruyputana respectively.

TABLE XV.

Christians by Race and Denomination.

1 This table corresponds with Table XVII of 1911 and is divided into three parts. Part I shows by race the total number of Christians in India distributed (a) according to their sect or denomination and (b) by locality, Part II shows the denominations returned by the Christian community of each Province, State or Agency and Part III gives the territorial distribution of each denomination. The term "Allied Races" includes Armenians and races in America and colonial countries elsewhere who are descended solely from European immigrants to those parts and the word "Anglo-Indian" includes all persons of mixed European and Asiatic descent. Goanese, when shown as such in the schedules, have been treated as Indian Christians. Armenians will be found on the title-page to Table XVI.

2 The number of Christians in this table falls short of that shown in Table VI by 890 persons (all males). This is due to the fact that in the North-West Frontier Province (*Agencies and Tribal Areas*) no denominational details were recorded for these persons.

3 The category "Indefinite beliefs" which appeared in the corresponding table of 1911 has been excluded on this occasion from this table as being inappropriate to a table which purports to show Christians. The figures for such entries as were included in this category are shown in a separate column in Table VI under the head "Minor Religions and Religion not returned," details being given on the flyleaf of that table. The South India United Church has in this table been given a separate heading as it is now an independent self-governing organisation. Many denominational names were entered in the schedules other than those shown in this table. The headings under which they have been tabulated are noted below.

TABLE XVI.

European and Allied Races and Anglo-Indians by Race and Age.

1 This table corresponds with Table XVIII of 1911. The following changes have been made in the details of the table.

(1) Armenians have been included among Europeans and Allied Races as their number and importance do not justify separate treatment. Their details by Provinces and States in the different age groups are noted below —

(2) In the case of Europeans and Anglo-Indians certain age groups are required for military purposes, and in the case of Anglo-Indians the Sanitary Department also desire to have the same age groups for the general population in districts. The table has accordingly been split up into two parts and arranged so as to give the information required in each case.

2 The number of European and Allied Races and Anglo-Indians as given in this table exceeds that shown in Table XV by 343 persons, viz., 294 Europeans (males 238, females 56) and 49 Anglo-Indians (males 26, females 23) as shown in the margin. This excess is due to the inclusion of (1) 25 Jews (males 16, females 9) in Bihar and Orissa and 1 Jew (male) in Baluchistan and (2) 317 persons (males 217, females 70) who were classed under Indefinite Beliefs and omitted from Table XV.

TABLE XVII.

Occupation or Means of Livelihood.

For the purpose of this table the scheme of classification adopted in 1911 has been followed without any radical alteration, but opportunity was taken to introduce corrections and modifications where the classification appeared obviously defective or incomplete. All occupations are now contained in 4 main classes, 12 sub-classes, 56 orders and 191 groups. For further explanation Chapter XII of the Report Volume should be referred to.

2. This table is divided into two parts. Part I contains a general summary giving the total strength of each class, sub-class, order and group for (a) India as a whole, (b) British territory and (c) States and Agencies. Part II gives for each Province, State or Agency the total strength of each class, sub-class and order and also of those groups the total strength of which is at least 50,000. In the section on economic aspects, the figures for "Partially agriculturist" and "Dependents" have been dispensed with, while for the selected groups figures for "Total Workers and Dependents" only have been given. In Bombay and Burma Farm servants have been included in Field Labourers as they could not be distinguished.

3. The population dealt with falls short of that in Table I by 2,887,219 per one who were not enumerated by occupation in the tract noted in the margin. The figures for Madras States in Part II include those for Cochin and Travancore, separate figures for which by orders will be found on page 212.

TABLE XXI.

Occupation of Selected Castes, Tribes or Races.

This table which corresponds to Table XVI in the India Tables Volume of 1911 is divided into two parts. Part I, which deals with certain castes selected on local considerations, has been compiled in all Provinces and States except in the Andamans and Nicobars, but the statistics are not reproduced here. Part II shows the occupations of Europeans and Anglo-Indians. In Coorg the information was tabulated in a different form and has not been incorporated here, while in Baroda the figures for Europeans and Anglo-Indians were combined. The occupations are arranged under twelve main heads corresponding to the sub-classes of the scheme of classification adopted in Table XVII. Armenians, whose number is small, are included among Europeans.

TABLE XXII.

Industrial Statistics.

The statistics in this table regarding various industrial concerns such as mines, mills, etc., were collected on a special Industrial Schedule, which was filled in by the owners or managers of establishments in which at least 10 persons were employed on the date of the census. The table, Parts I and II of which correspond to Table XV-E of 1911, has on this occasion been divided into seven parts.

Part I shows for the whole Empire the number of persons employed in each kind of industry, distinguishing between establishments in which mechanical power is used and those in which it is not, and classifying them according to the number of persons employed.

Part II shows the distribution of industries by each Province, State or Agency without all the details given in Part I.

Part III contains particulars as to the ownership and management of the more important industrial concerns in the main Provinces and States.

Parts IV and V record the birth-place and religion of the skilled and unskilled workmen respectively in selected industries in the main Provinces and States.

Part VI furnishes details of the power employed.

Part VII gives the number of looms in use in Textile Establishments.

2. For the purpose of this table the various industrial undertakings have been divided into 16 main heads and 128 sub-heads, minor concerns not falling under these sub-heads being grouped together as "Others." When two or more industries are combined in one factory, the classification has usually been made with reference to the first named in the return, thus a cotton-ginning, rice-husking and flour-grinding mill has been classified under "Textiles and connected Industries (cotton)."

3. Jail Factories have been omitted from this table. The detailed classification of the staff of 30 collieries in Bengal employing 4,784 persons is not available, hence the details against (1) India, (2) II-Mines, and (3) Collieries in columns 5-18 of Parts I and II do not work up to the totals in columns 3 and 4.

4. The statement below shows the establishments which have been included in "Others" under each main head—

I—*Growing of Special Products*

Botanical gardens
Cinnamon plantations
Fibre plantations
Fruits, gardens and orchards
Nursery and seeds growing
Resin tapping

TABLE XXIII.

Summary Figures for Districts.

1 This table contains for easy reference a few of the salient figures for the individual Districts or States in each Province, State or Agency. For further particulars regarding these minor units the Provincial Census Reports should be referred to.

2 The figures for States in political relation with Local Governments are given below those for the British Territory administered by the same Local Government.

3 The figures for Central India (*Agency*) and Gwalior State in this table include those for Nandwar and Gangapur parganas respectively which are situated in the Mewar State of Rajputana (*Agency*), similarly the figures for Rajputana (*Agency*) include those for its villages situated in Ajmer-Merwara and for Nimrol in Gwalior. This is why there is a discrepancy between the area and population of Ajmer-Merwara, Central India (*Agency*), Gwalior and Rajputana (*Agency*) as here shown and the corresponding figures in Imperial Table I. There is also a difference of 1,421 square miles between the areas shown in this table and in Table I. This is due to the fact that the areas of Rajputana and Ajmer Merwara as shown in Table I are based on the Imperial Survey while in this table they are given according to the latest revenue records.
